RE: 609 Wilson Street  
Florence, SC

Dear Dr. Brown,

We are pleased to submit the enclosed limited Asbestos Inspection Report for the above captioned project. The inspection was conducted on April 12, 2026, in conformance with the South Carolina Department Environmental Services (SCDES) Standards of Performance for Asbestos Projects, Regulation 61-86.1 and the Environmental Protection Agency (EPA) minimum sampling requirements.

If you have any questions or need any additional information please do not hesitate to call me at 803.807.6488 or email me at [enga@echconsultants.com](mailto:enga@echconsultants.com).

Respectfully,

Enga Hair, CIH, PE

## EXECUTIVE SUMMARY

The purpose of this investigation was to conduct a visual inspection, sample and analyze suspect asbestos containing materials (ACM) which may be disturbed during the future **demolition**, to determine if any occupational exposures and/or environmental releases of airborne asbestos may occur.

The suspect materials were those identified in the United States Environmental Protection Agency (EPA) manual, Guidance for Controlling Asbestos. The identification of ACM meet compliance standards established the EPA under regulation 40 CFR, Part 61, National Emission Standards for Hazardous Air Pollutants, Asbestos NESHAP Revision, Final Rule. Additional suspect ACMs may be present in locations that are inaccessible. If discovered, these suspect materials should be sampled and tested. A material that is of similar color, texture, age and size throughout the building to a material that has been identified as asbestos containing should be assumed to contain asbestos.

The survey was conducted by licensed inspector Enga Hair - #01591 on April 12, 2026. Bulk samples were recorded on a Chain of Custody and submitted to a Polarized Light Microscopy (PLM) laboratory. Eurofins|CEI Labs, Inc., located in Fort Mill, South Carolina, is accredited by the National Voluntary Laboratory Accreditation Program (NVLAP) for satisfactory compliance with criteria established in Title 15, part 7, Code of Regulations, by the National Institute of Standards and Technology (NIST). The laboratory analysis reports the specific type of asbestos identified (there are six (6) types of asbestos minerals) and the percentage of asbestos present.

The EPA defines materials as asbestos containing IF an asbestos content of greater than 1% is detected in a representative sample. The sampling strategy utilized throughout the survey complies with the instructions specified in the EPA Regulation 40 CFR, Part 763.

ECH Consultants appreciates the opportunity to provide this limited asbestos inspection report for use by City of Florence and their assigns.

## BACKGROUND

The structure located at 609 Wilson Street, Florence, South Carolina, is scheduled for a future demolition. The facility has the following characteristics:

Single story brick and wooden structure substantially burned  
Approximately 1,700 Square Feet  
Approximately 1,700 Square Feet of Shingles  
Approximately 2,800 Square Feet of Drywall with Joint Compound throughout  
Wooden floors throughout  
Wooden windows with Approximately 120 LF of window glaze

## ASBESTOS FINDINGS

The following Table details the sixteen (16) Bulk Samples taken

| Sample # | Description    | Classification | Condition | Potential for Disturbance |
|----------|----------------|----------------|-----------|---------------------------|
| 1        | Drywall        | None Detected  | Damaged   | Low                       |
| 2        | Drywall        | None Detected  | Damaged   | Low                       |
| 3        | Drywall        | None Detected  | Damaged   | Low                       |
| 4        | Drywall        | None Detected  | Damaged   | Low                       |
| 5        | Drywall        | None Detected  | Damaged   | Low                       |
| 6        | Joint Compound | POSITIVE       | Damaged   | Low                       |
| 7        | Joint Compound | POSITIVE       | Damaged   | Low                       |
| 8        | Joint Compound | POSITIVE       | Damaged   | Low                       |
| 9        | Joint Compound | POSITIVE       | Damaged   | Low                       |
| 10       | Joint Compound | POSITIVE       | Damaged   | Low                       |
| 11       | Glazing        | POSITIVE       | Damaged   | Low                       |
| 12       | Glazing        | POSITIVE       | Damaged   | Low                       |
| 13       | Glazing        | POSITIVE       | Damaged   | Low                       |
| 14       | Shingle        | POSITIVE       | Damaged   | Low                       |
| 15       | Shingle        | POSITIVE       | Damaged   | Low                       |
| 16       | Shingle        | POSITIVE       | Damaged   | Low                       |

Please refer to the enclosed Asbestos Analysis for additional information

## ASBESTOS CONCLUSIONS

The following represents areas that are POSITIVE for Asbestos:

Non-Friable: N/A

Friable: Approximately 2,800 Square Feet of Drywall with Joint Compound

Approximately 120 LF of window glaze

\*Asbestos Containing Materials identified in this inspection to be removed as part of demo with RACM

Florence, SC 29501

**CLIENT PROJECT:** Florence , 609 Wilson St  
**LAB CODE:** 741668-1

Dear Enga,

Enclosed are asbestos analysis results for PLM Bulk samples received at our laboratory on 04/14/26. The samples were analyzed for asbestos using polarizing light microscopy (PLM) per the EPA 600/R-93/116: Method for the Determination of Asbestos in Bulk Building Materials and EPA 40 CFR Appendix E to Subpart E of Part 763: Interim Method of the Determination of Asbestos in Bulk Insulation Samples.

Sample results containing >1% asbestos are considered asbestos-containing materials (ACMs) per EPA regulatory requirements. The detection limit for the EPA 600 Method is <1% by calibrated visual estimate.

Thank you for your business and we look forward to continuing good relations.

Kind Regards,

Kamila Reichert,  
Laboratory Director

NVLAP 600323-0

---

Due to the limitations of the EPA 600 / R93 / 116 method, nonfriable organically bound materials (NOBs) such as vinyl floor tiles can be difficult to analyze via polarized light microscopy (PLM). EPA recommends that all NOBs analyzed by PLM, and found not to contain asbestos, be further analyzed by Transmission Electron Microscopy (TEM). Please note that PLM analysis of dust and soil samples for asbestos is not covered under NVLAP accreditation. Estimated measurement of uncertainty is available on request.

**LAB CODE:** 741668-2

Dear Enga,

Enclosed are asbestos analysis results for TEM bulk samples received at our laboratory on 04/14/26. The samples were analyzed for asbestos using transmission electron microscopy (TEM) per Chatfield/EPA 600/R-93/116 Sec. 2.5.5.1 method.

Sample results containing >1% asbestos are considered asbestos-containing materials (ACMs) per the EPA regulatory requirements. The detection limit for the TEM Chatfield/EPA 600/R-93/116 Sec. 2.5.5.1 method is <1% depending on the processed weight and constituents of the sample.

Thank you for your business and we look forward to continuing good relations.

Kind Regards,

A handwritten signature in black ink that reads "Kamila Reichert".

Kamila Reichert,  
Laboratory Director

Eurofins Built Environment Testing East, LLC makes no warranty representation regarding the accuracy of client submitted information in preparing and presenting analytical results. Interpretation of the analytical results is the sole responsibility of the client. This report relates only to the samples tested or analyzed and may not be reproduced, except in full, without written approval by Eurofins Built Environment Testing East, LLC.. Estimated measurement of uncertainty is available on request. Samples were received in acceptable condition unless otherwise noted.

Information provided by customer includes customer sample ID, location, volume and area as well as date and time of sampling. Eurofins Built Environment Testing East, LLC recommends between 0.500 and 0.200 grams of sample material. Any weight below 0.100 grams is considered below protocol guidelines.

Eurofins Built Environment Testing East, LLC establishes a unique Lab Sample ID, for each sample, by preceding each unique Client Sample ID with the laboratory RES Job Number. Eurofins Built Environment Testing East, LLC will analyze incoming samples based on information received and will not be responsible for errors or omissions resulting from the inaccuracy of original data. By signing, client/company representative agrees that submission of the following samples for requested analysis as indicated on this Chain of Custody shall constitute an analytical services agreement with payment terms of NET-30. Failure to comply with payment terms may result in a 18% APR finance charge.
